

APPENDIX K

Current Edits to the QWIC LEARN modules: (3/17/11)

Global Edits:

Remove the audio from the answers of the evaluation questions, so that the learner doesn't need to hear them before selecting an answer.

Dietary edits

2005: Remove "Health Outcomes for all WIC participants" graphic from this slide and leave up the photo before it till the end of the narration

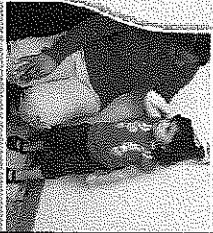

11	2006	
		<p>When determining the completeness of a Dietary Assessment, the goal is to get a full picture -- not a partial picture.</p> <p>For example, imagine this scenario. . .</p> <p>When conducting an assessment, you focus on asking what foods are typically eaten by the participant and then stop. In doing so, what questions remain unanswered? What else is included when you consider the nutrition behaviors that influence or impact the consumption of food?</p> <p>For example...</p> <p>Where are the foods being eaten? Are they eaten in the car, at a family meal, in front of the TV?</p>

	<p>How much food is being eaten? In other words, what are the portion sizes like?</p> <p>How is the food being prepared? Fried, baked, or boiled?</p> <p>These types of open-ended questions illustrate the complexity of feeding practices and eating behaviors.</p>
--	---

Anthro edits:

3001: There is a portion of a telephone cord and a computer mouse that is not connected to anything! This needs to be fixed and the mouse and the cord removed from the photo.

4004: slow down the animation

29	4010 <i>Practice Exercise</i>	<p>Review the photo for accuracy in taking a height and answer this question.</p> <p>All of the following points in the picture demonstrate good measurement methods EXCEPT:</p> <p>A. Feet are not together & shoes are not off</p>	<p>Let's continue to test your skills.... This question is a quick check on your ability to accurately take a height measurement.</p> <p>Review the photo for accuracy in taking a height measurement, then answer this question.</p> <p>All of the following points in the picture demonstrate good measurement methods EXCEPT:</p>	<p>4010a photo: Staff performing height on Angle using bad tech</p>  <p>nique: Feet are slightly spread apart with Angle on tip-</p>	<p>Show photo on screen for this question</p> <p>Multiple Choice Answer: A</p>
----	----------------------------------	--	--	---	--

		<p>B. Head is against the wall</p> <p>C. Feet are flat on the floor</p> <p>D. Shoulders & back are not slouched</p>	<p>Select the best answer.</p>	
		<p>4010b: (correct - letter A) – Good job! Pay attention to all four contact points – head, heels, buttocks, and shoulder blades. For proper measurement of height, it is very important for all four areas to touch the measuring surface.</p>	<p>4010c: (incorrect) – No, not quite – better go back and review! The correct answer is A. Pay attention to all four contact points – head, heels, buttocks, and shoulder blades. For proper measurement of height, it is very important for all four areas to touch the measuring surface.</p>	
			<p>toe slightly with one foot</p>
