

Prenatal Attachment

The placenta provides baby with nutrients necessary for survival.

Post-partum Attachment

Mother's milk provides baby with nutrients necessary for best health and development.

**Share a close bond
with your baby.**

World Breastfeeding Month

August 2006

Instructions

Set your printer to print on legal size paper making sure that the pages of the document format correctly for your printer. (This is NOT a PDF document so you may need to make some minor modifications to the margins to get it to print evenly.)

Print off the pages and then mount and arrange each piece on poster board using the suggested design on the following page and adding your own borders, etc. Or you can design your own layout.
